

CUSTOMER REVIEWS

Dog: «I have a Silver Buff American Cocker Spaniel who has been suffering from itching and mild eczema. He also has red discoloration under the eyes, mouth and stomach. I have used Optima pH4 Skin Wash and Optima pH4 Spray and I am very happy! He does not have an itch anymore and has not had any eczema. I have received many compliments on his nice coat. The skin wash is very good, it foams well, and he just smells very clean! It must be good for the dog not to smell perfume - other shampoos have a strong perfume smell. Also, he does not need conditioner, the coat is easy to comb through. This is all thanks to your great products! We will always use them.»

Regards, Charlotte and Leo

Horse / pony: «I have used the Optima pH4 products on my pony, who was suffering from eczema, and none of the products I previously tried can be compared to Optima! It can't be praised enough, and I take pleasure in promoting and recommending Optima pH4 Skin Wash and Skin Spray to others who have horses and ponies with itchy skin. I am deeply grateful and very relieved to have found products that easily minimise the condition, which was so awful that we considered putting him down»

Sheep: Sheep farmer from Jæren. «We have switched to Optima pH4 Gel as a lubricant and reduced the number of uterine infections, from 20 last year to 2 this year. We always have problems with uterine infections, but after changing the lubricant, the problem was greatly reduced. We use Optima pH4 Gel for obstetrics. Even our vet is convinced.»

OTHER OPTIMA PRODUCTS

pH4 UNIVERSAL WASH

A cleaning product that can be used everywhere in the home and at work. It has no negative effect on health and the environment and is "kind" to furniture, equipment etc. The organic acids make it difficult for harmful bacteria (such as E.coli, S.aureus, Salmonella and Listeria) to grow.

pH3,6 ORGANIC ACIDS

This is a mix of acetic acid and other organic acids that inhibit the growth of harmful bacteria and fungi. Can be used if you want an even stronger effect than just Optima pH4 Universal Wash alone. The ingredients are approved for use in food and are therefore ideal for use in the kitchen, e.g., for cutting boards etc.

THE OPTIMA CONCEPT

- **All Optima products have a pH of 4**

Balanced skin has a low pH (4-6), plenty of natural oils and normal skin flora. pH 4 in Optima is important for maintaining this balance and repairing imbalanced skin. Organic acids are important ingredients for achieving this.

- **Inhibitory effect on harmful bacteria**

and fungi due to containing organic acids. These are acids that also are found in nature and in many healthy foods. Vinegar, lemons, cranberries, lingonberries, cloudberries and rowanberries are such foods. The great thing about these acids is that they do not harm the beneficial bacteria.

- **Alginate is an important ingredient**

Optima pH is the only skin care series that contains alginate, which is produced from seaweed and kelp. Alginate is a well-known ingredient in natural wound dressings – Alginate dressings.

The result is unique products that strengthens the skin's own defense mechanisms, which protects our skin from bacteria, fungi and environmental pollutants and makes the skin soft and supple. The Optima pH Skin Wash product does, among other things, not remove the natural oils from the skin and hair/fur. Shampoos and soaps with high pH strips the skin of the natural oils. It is very harmful to both people and animals. With pH below 4.5, and in the presence of organic acids, harmful bacteria have difficulty surviving, while the normal skin flora is little affected.

- All Optima products (with the exception of the washing product) contain raw materials approved for use in food. The Optima products do not contain perfumes, harmful chemicals or environmental toxins.

OPTIMA pH4 SKIN SPRAY FOR ANIMALS

Ingredients: Water, glycerol, organic acids, alginate, aroma, colour

Optima pH4 Skin Spray for Animals has a good effect on skin problems in all animal species. Must be applied at least twice a day. In some cases, it is beneficial to use it more often. Use it for approx. 14 days or as long as necessary. Great for preventing skin disorders. Use both pH4 Skin Wash and pH4 Skin Spray for Animals to get the best result.

OPTIMA pH4 GEL

Ingredients: Water, glycerol, organic acids, carboxymethylcellulose, alginate, aroma, colour

For use on surface wounds and skin problems in all animals, udder and teat ointment, as an obstetrical lubricant for use during lambing, calving and farrowing. pH4 preserves the good and normal bacterial flora and has an inhibitory effect on harmful bacteria.

OPTIMA pH4 FORESKIN CLEANER

Ingredients: Water, glycerol, organic acids, alginate, aroma, colour

Wash / rinse with diluted Optima pH4 Skin Wash for Animals before first application. Then use undiluted pH4 Foreskin Cleaner 2 times a day and as long as required. When the condition has normalised, it can be used 1-3 times a week to keep the problem in check. pH4 preserves the good and normal bacterial flora and has an inhibitory effect on harmful bacteria.

OPTIMA pH4 EAR CLEANER

Ingredients: Water, glycerol, organic acids, alginate, aroma, colour

pH-balanced, mild and caring ear cleaner. Reduces itching, irritation and is good for mild inflammations without open wounds. Apply as needed 2 times a day for approx. 14 days. For maintenance, use 1-3 times a week.

OPTIMA pH4 SKIN WASH FOR ANIMALS

Ingredients: Water, glycerol, surfactants (50% less than in other skin care products), organic acids, alginate, salt, aroma, colour

Does not remove natural oils from skin and fur. Good for dry, itchy skin and other skin problems. Moist the fur with lukewarm water. Massage thoroughly with skin wash and rinse after 1-2 min. Use both pH4 Skin Spray and pH4 Skin Wash for Animals to get the best result.

OPTIMA pH4 TEAT WASH

Ingredients: See pH4 Skin Wash for Animals

pH-balanced, mild, cleansing and moisturising wash animal teats. Gives soft and elastic teats. By using Optima pH4 Teat Wash, the teats get cleaner than just washing with water. This means less dirt and bacteria in the milk. It helps to facilitate the good bacteria and can never give residual concentrations in the milk. Can be used in a milking robot.

OPTIMA pH4 TEAT SPRAY

Ingredients: See pH4 Skin Spray for Animals

pH4 Teat Spray for teat problems and for surface wounds. Gives soft and elastic teats. pH4 preserves the good and normal bacterial flora and has an inhibitory effect on harmful bacteria. Optima pH4 Teat Spray is the product that has shown clear effect on udder health and is an affordable and well-documented measure for udder health. Can be used in a milking robot.

OPTIMA pH4 STOMACH

Ingredients: Water, glycerol, organic acids, alginate, aroma, colour

pH-adjusted supplementary feed with vinegar. By adding acids in form of vinegar to the animal feed / water, it preserves the good and normal bacterial flora in the mouth, throat, stomach and intestines, and pH4 has an inhibitory effect on harmful bacteria.
